PROJECTS

Project Breathe— *A Dashboard of Covid-19 Data*

A responsive dashboard in React created with Material-UI and Recharts utilizing the Covid Act Now API. The app features 50 U.S. states and each has nine metrics related to Covid-19.

Gourmet Games— *Finds New Games to Play*

In the Gourmet Games React app users will be presented with new game titles (coming from the RAWG gaming database API). A fully responsive card layout allows users to click and view each title in detail. Redux is used to manage the state of the three categories and framer motion is behind the animations.

Fresh Dish— *Generate a New Recipe to Cook*

Fresh Dish is the app that gives users a new, random recipe from TheMealDB API. The app adapts to users on mobile and desktop. I used firebase for a lightweight database to store the user's favorite recipe and for authentication.

EXPERIENCE

Front-End Dev, Chicago— *Building Projects*

June 2020 - PRESENT

Teaching myself how to create amazing web apps.

Contract Work, Chicago— *Technical Writer*

December 2019 - May 2020

I was hired by various companies to write technical documentation of various kinds. Most were whitepapers based on technical research.

My most notable work was a whitepaper that I've written for a telecom company called Exacaster.

BigMarker, Chicago— SaaS *Sales Rep*

July 2019 - November 2019

I worked on commission to stir-up some business for our high-end packages through prospecting, demoing, and negotiating with customers.

TECHNICAL SKILLS

Programming - HTML, CSS, SASS, JavaScript(ES6)

Libraries & Frameworks - React, Redux, Styled Components, Recharts, Material-UI, Axios, Firebase.

Tools & Platforms - Git, Firebase, Vercel.

Design - Figma, Photoshop.
